Different Colours can affect us in many different ways; that's according to Verity Allen. In her new series «Colour me Healthy», Verity looks at the ways that colours can influence how hard we work and the choices we make. They can even change our emotions and even influence how healthy we are.

«Have you ever noticed how people always use the same colours for the same things?» says Verity. “Our toothpaste is always white or blue or maybe red. It's never green. Why not? For some reason we think that blue and white is clean, while we think of green products as being a bit disgusting. It's the same for businesses. We respect a company, which writes its name in blue or black, but we don't respect one that uses pink or orange. People who design new products can use these ideas to influence what we buy.”

During this four-part series, Verity studies eight different colours, two colours in each programme. She meets people who work in all aspects of the colour industry, from people who design food packets, to people who name the colours of lipsticks. Some of the people she meets clearly have very little scientific knowledge to support their ideas, such as the American “Colour Doctor” who believes that serious diseases can be cured by the use of coloured lights. However, she also interviews real scientists who are studying the effects of green and red lights on mice, with some surprising results.

Overall, it’s an interesting show, and anyone who watches it will probably find out something new. But because Verity goes out of her way to be polite to everyone she meets on the series, it’s up to the viewers to make their own decisions about how much they should believe.

**16.** Step inside this magical 1850s «Cinema» for an exciting tour of Edinburgh, the capital of Scotland. As the lights go down a brilliant moving image of the capital appears before you, while the guide tells the story of Edinburgh's historic past.

17. The National Waterways Museum of Gloucester brings to life the time when Britain's waterways were dug between towns. Transport by these ways was cheaper than transport by land. Many exhibits give visitors the chance to relive the Age which helped to revolutionize Britain's water system.

18. Black Country Museum is an open-air museum. Your visit there is always exciting and enjoyable. Guides in national costumes and working demonstrators tell visitors a story of the time when different machines were invented in Britain and factories began to develop very quickly.

19. Travel through time and discover the colourful story of travel. See shiny buses, tube trains and trams of different centuries. As you step into the past you'll meet people who've kept London moving for 200 years. Hold tight as you put yourself in the driving seat and enjoy your journey.

20. This museum is full of wonderful models of trains, buses, ships and cars. See the 1920s model Story Land Park and play the old slot-machines. It also has a nursery of the beginning of the 20th century. The wonderful collection of dolls contains different marionettes from Ancient Roman Gladiator doll to figures of today.

21. This museum illustrates the development of human knowledge through different instruments. The museum has a clockwork model of the solar system from 1750 as well as microscopes, telescopes, navigation instruments, electrical machines and tools.
